

Optimize facility management performance for a better tomorrow.

Sustainability Facility Professional™ (SFP™)

What is the SFP Credential?

IFMA's SFP credential is unlike any other credential program. Sustainability is broader and more significant than complying with a building rating system; it is a commitment to improving the facility's impact on the environment and people—not just at one point in time but continually.

Why Should You Become an SFP?

- Use knowledge-based and data-driven methods to develop solutions that provide the highest value for your facility, organizations and community.
- Challenge yourself and your organization to go beyond the current thinking.
- Take full advantage of the skills and competencies in your FM toolkit.
- Develop new and innovative sustainable solutions to facility issues.
- Gain the recognition of being an informed champion, partner and steward of the built environment in your organization and your community.

What Will You Learn?

The SFP program is made up of three focus areas designed to equip professionals to integrate sustainability efforts with the organization's values and strategies, present a business case for a sustainability initiative, evaluate initiatives from a financial point of view, and track and report accomplishments. These focus areas include:

- Strategy and Alignment for Sustainable Facility Management
- Managing Sustainable Facilities
- Operating Sustainable Facilities

Prepare and Earn the SFP

The IFMA SFP Credential Program™ is the only tool you'll need to learn the SFP topics and earn the SFP credential! This comprehensive self-study program combines printed and/or electronic reading materials with interactive onlinestudy tools and online SFP final assessments. Instructor-led courses will be available in the summer of 2011.

Self-study materials include:

Print Materials: Three printed/electronic focus areas teach the SFP topics in an easy-to-understand format.

Online Study Tools: Interactive online study tools including quizzes, case studies, e-Flashcards, progress reports and more will help you apply and retain the SFP concepts.

SFP Assessments:

Successfully complete each final assessment and submit your application to IFMA to be awarded your SFP credential.

Become an SFP and play a key leadership role in creating, managing, and operating sustainable facilities across the FM spectrum.
